

PURCHASING A CAR LIFT

INITIAL CONSULTATION

The first step in proposing a car lift is for us to establish your vehicles to be stored and that will allow us to determine vehicle heights under and above the ramps. Additional information gained will be the weight of the vehicles, length of the vehicles and your ceiling height.

Lifts are available in several configurations (1 post, 2 post, 4 post, double wide, extra high, extra long, extra strong, etc.) We'll discuss the advantages and disadvantages of each and gain your opinion. We locate the exact point where the lifts columns will be most appropriate and whether the entry ramps will fit into your garage, while being attached to the ramps.

Compiling all of this information will allow us to recommend the correct lift for your needs. In a typical installation other concerns exist. We will assess garage door tracks and location, as well as how much clearance may be required.

***Should you decide to order a car lift from us,
your work is done,
and our work has just begun.***

Our services include the following:

- ❖ *Place an order with the appropriate manufacturer.*
- ❖ *Establish an installation date.*
- ❖ *Accept delivery at our warehouse.*
- ❖ *Load lift onto an open 24' trailer.*
- ❖ *Transport lift to job site.*
- ❖ *Unload lift.*
- ❖ *Assemble lift utilizing an experienced AG professional installer.*
- ❖ *Adjust cables, fittings, levers, ladders, ramps, etc.*
- ❖ *Fill hydraulic fluid system with several gallons of oil.*
- ❖ *Test lift for proper operation.*
- ❖ *Instruct owner in the safe and proper operation of the lift.*

We understand busy schedules and make the installation process as FAST and seamless as possible for our customers. We have the knowledge and experience that enables us to do just that. All you have to do is call for an initial consultation and we will take care of the rest!
